SUNDAY MORNING, JULY 21,

The Barbarities of the Invaders of the South. We commend to the people of this section the following extracts from the editorial columns of the New York Times, an intense, irrepressible, Black-Republican organ. Mr Holt, an ex-cabinet officer, in his letter so fulsomely raised by the Louisville Journal, which paraded it in its columns as an able, patriotic decument, said the northern soldiers were our best friends-the protectors of the people of the Sou h, that they would not ruthlessly trample a flower, or even a blade of grass, etc. Here are some of the patriotic acts of these poble fellows:

The letter from Fortress Monroe, after reciting the sack of the village o' Hampton, a town of two thousand or twenty-five hundred inhabitants, in which "our soldiers had broken open the houses, rifled the boxes, carried off tables, chairs, sofas, and whatever else they could make useful, and wantonly destroyed what they could not take away;" and after mentioning the indecent desecration of "a live that officer to suspend the writ of habens newly made grave of a child,22 goes on with the following statements and reflections:

"I could give scores and hundreds of instances of similar outrages. Is it surprising that the people here look upon us as vandals and barbarians? By no possible process could we better contrive to make these bitterly and relentlessly hostile toward the Union then in this way. Gen. Butler, of course, disapproves all this—but that is not enough. He should have issued a proclamation, as soon as he arrived, inviting the citizens to remain at home, and assuring them of the perfect protection of their lives and property. And then every violation of private rights-every in stance of theft or plunder, gwould have been punished with a rigor which would have of fectually prevented a repetition of the act. If some officer of the regular army-such a man as Gen. Worl, for example-bad been here, we should have had none of these disgraces. If the citizens had remained at home, their property would have been much safer. But they were afraid to do so, and not without reason. One of our co onels one night arrested, and brought into the fort, a whole family-including an old lady and three or four small children, on the charge and direction of the congress, of the United that they were displaying signal sights for the States. rebels. It turned out that they kept a light burning on account of a sick child. How could any one feel safe when exposed to such

Nor need the Washington authorities go even as far as Fortress Monroe to find Hustrations of the want of that first requisite of an army, a thorough military police. Our reports from Washington and Alexandria are filled with parratives of outrage and violence; citizens lynched and rebbed in the streets, and houses burned to the ground by rictons sol-Mers; troops in large bodies throwing down other evidences of the laxity with which the rules of military discipline are administered. commander-in-chief.
